The Ohio Compost Association is sponsoring five free compost operator training sessions from November 2007—March 2008. The training sessions include specific procedures for measuring compost materials for facilities without scales as well as information on sampling of compost products per Ohio EPA requirements. All participants will receive free training materials. The first session on November 16, 2007 is a demo of the full training program that will occur at the remaining sessions (January-March 2008).

Training funds are provided by the Ohio EPA Environmental Education Fund grant. Field data and training assistance was provided by the Ohio Agricultural Research Development Center of The Ohio State University. Training will be conducted by GT Environmental, Inc.

Training Agenda (10:00 am—12:00 pm)

- Review of OEEF Grant Objectives and Results
- How to Measure Incoming Compost Materials without Scales
- Review of New Volume Conversion Factors for Compost Materials
- EPA Compost Sampling Procedure Made Easy
- How to Prepare and Submit Compost Facility Annual Report
